

One - Day Writing Across Disciplines Training

Participants will explore how to effectively embed writing strategies into daily classroom instruction to strengthen students' academic language and writing proficiency.

This session emphasizes the integration of writing across the curriculum, ensuring that writing becomes a meaningful, consistent, and intentional part of students' learning experiences in all content areas.

Educators will learn how to implement best practices that support structured and unstructured writing opportunities, guiding students through a variety of writing modalities that promote critical thinking, language development, and content mastery.

Participants will also examine how to design lessons that raise both academic and linguistic rigor, empowering all students to express their understanding through writing in both their first and second language. By the end of the session, teachers will have practical strategies to scaffold writing instruction, create consistent writing routines, and build a classroom environment where writing is a powerful tool for communication, reflection, and academic growth.
